

Cosmetic dentistry...

While we are dedicated to solving the painful problems that some patients may have when they first visit the Hereford Dental Clinic, we also take great pride in our ability to realise a patient's ambition to look better and to smile with confidence.

Your smile is the first thing someone notices about you, and people often make a judgement about you based on your smile. Thanks to the growing field of cosmetic dentistry and professionals dedicated to appearance-related dental care, anyone these days can get the smile they've always dreamed of. There are many different procedures in the field of cosmetic dentistry to help a variety of smile problems, and our treatments will make the most dramatic improvement to your appearance, and far outweigh any other cosmetic surgery procedure.

At the Hereford Dental Clinic we offer a range of procedures including:

- Porcelain Veneers
- Ceramic Crowns
- White Fillings
- Computer Aided Design and Manufacturing of Crowns and Inlays (CEREC 3D)

In order for us to understand your needs, please contact us for a smile assessment with an experienced dentist.

Porcelain Veneers

Porcelain veneers, one of cosmetic dentistry's more recent developments, are custom-made wafer-thin shells of porcelain that fit over and bond onto the front side of teeth to make a cosmetic improvement in their appearance. Porcelain veneers are routinely used to enhance the look of teeth that are stained or discoloured, worn, chipped or misaligned.

Lumineers are a type of porcelain veneer that offer a painless way to a permanently white and perfectly aligned smile. Our dentists can apply these contact lens-thin "smile shapers" to teeth with minimal grinding or shaving, transforming teeth into a naturally beautiful smile that perfectly suits an individual patient. Lumineers can even be placed over existing crown or bridgework without needing them to be replaced.

Ceramic Crowns

For teeth that have been broken, or have been weakened by decay or a very large filling, crowns are an ideal restoration treatment. They can provide a very aesthetic, natural-coloured solution to unsightly teeth. All-ceramic crowns offer a metal-free alternative, which can give the strength of a bonded crown and the appearance of a porcelain crown, suitable for use in all areas of the mouth.

White Fillings

The days of using unsightly mercury, silver or related substances for teeth fillings have long gone, and at our Hereford practice we use tooth-coloured or composite fillings as an alternative to amalgam (mercury) varieties. They are placed in teeth with cavities or old, aged fillings in need of restoration. The dentists will shape the filling to follow a natural tooth's contours, restoring it to its natural beauty

CEREC®

At Hereford Dermal Clinic we are proud to present CEREC® 3D which uses Computer Aided Design technology allowing the fabrication of Cerec restorations to quickly restore damaged teeth. Using Cerec technology we can produce any kind of tooth restoration. Chipped and discolored teeth can be repaired using Cerec porcelain crowns and veneers. Broken down molars can be restored using inlays and onlays.

CEREC® 3D uses high quality ceramic materials, which are anti-abrasive, and plaque resistant. Teeth can be restored in one visit using restorations that resemble the composition of natural tooth structure and without the need for impressions. No second appointment will be necessary!

Cosmetic testimonials...

F I first attended the Hereford Dental Clinic having seen their offer of a free consultation on their internet site. I met with Dr Gursh Bajwa who was very friendly and who immediately made me feel at ease. The various options of treatment available were explained to me, the most expensive option was not pushed at me like others have done and I made my own decision.

The clinic offered a flexible-no interest payment plan which was of great benefit to my personal circumstances. The whole process took several months but on each visit Dr Gursh Bajwa and staff were wonderful. The Veneers and Whitening treatment have made my teeth look fantastic and I couldn't be happier. I now have the confidence to smile which is a wonderful feeling. All the staff at the clinic are friendly and welcoming and I highly recommend them to any further clients. I will certainly be returning for years to come.

P.S.

Dear All, I just wanted to say thank you so much for the flowers, they were lovely, and such a wonderful surprise, I am so happy with my new smile and send thanks to you all, especially Gursh, see you soon.

A.S.

F I visited Hereford Dental Clinic for a Consultation about replacing my veneers. All the staff were knowledgeable and helpful and when I started my course of treatment their approach was professional and friendly, putting me at ease during my anxiety over the treatment. The whole experience has been positive and I would recommend the practice to anyone, in fact I have!

D.M.
